

APPLICATIONS

Eni Arnica ABX is a fully synthetic and biodegradable hydraulic fluid, containing antioxidant, anti-rust, anti-wear and friction modifiers additives; characterized by a very high viscosity index, it has an excellent features at low temperature.

The anti-wear additives ensures a long service life of mechanical components and the presence of friction modifiers additives allow, in case of slow movements, the proper functioning of the mechanical components without stick-slip phenomena.

Eni Arnica ABX is ideal for door opening and closing devices, automatic gates and shock absorbers.

CUSTOMER ADVANTAGES

- Excellent lubricating properties and excellent performance at very low temperatures
- Biodegradable product. Reduces the environmental impact on water in case of accidental spills
- Prevents stick-slip phenomena

SPECIFICATIONS - APPROVALS

- ISO 15380 HEPR
- WGK 1

CHARACTERISTICS

Properties	Method	Unit	Typical
Appearance	APM 27	-	clear liquid
Density at 15°C	ASTM D 4052	kg/m ³	827
Viscosity at 40°C	ASTM D 445	mm ² /s	15
Viscosity Index	ASTM D 2270	-	286
Flash point COC	ASTM D 92	°C	164
Pour point	ASTM D 97	°C	-48
