

## APPLICATIONS

**Eni Betula 32** is a refrigerating compressor lubricant formulated with highly refined naphthenic base oils particularly recommended for hermetic type compressors (domestic fridges), industrial units and heat pump systems that operate with standard refrigerating fluids (R-12, R-22 and ammonia, SO<sub>2</sub> excluded).

## CUSTOMER ADVANTAGES

- Long operative life thanks to a very good oxidation resistance
- Compressor efficiency ensured by low tendency of lubricant to create carbon deposits
- Prevention of particles solidification inside the espansor circuit thanks to very low flocculation and pour points
